

Partial Disability, Earnings, and Treatment Questions about Social Security Benefits

Q: Is it possible to receive partial Social Security benefits for a partial disability?

A: In the world of social security benefits, there are not many clear cut answers. But this question has one; and that answer is "no." Though some other federal and state programs offer benefits to the partially disabled, social security benefits do not. According to the SSA, an applicant either has a qualifying disability, or he or she does not. With Social Security benefits, you are either disabled or you are not disabled, and therefore either approved or denied.

Q: If my doctors say that treatment wont improve my condition, why do I need to keep seeing them?

A: Even if a doctor cannot treat your disability, seeing a medical professional is a very important part of having your Social Security benefits claim approved. Why? Because one of the most important parts of proving that you have a disability (and should receive Social Security benefits) is documentation. For proof of your disability, the SSA will thoroughly explore your medical records. If you dont see a doctor (and therefore have no real documentation of your disability) it is very possible that you will be rejected for social security benefits.

When applying for Social Security benefits, the SSA considers it your own responsibility to document and track the progress of your disability. If you are applying or plan to apply for Social Security benefits, it is very important to regularly see a doctor; even if the visits do nothing for your condition. Be sure your doctor keeps track of your symptoms to give the SSA a thorough history of your disability. The more documentation and evidence you have for your disability, the better your chances of getting social security benefits.

Q: I am able to work but not at what I used to nor can I earn the same money I used to. Can I still file for Social Security benefits?

A: In this case, yes, you can apply for social security benefits. But this does not necessarily mean that your claim will be accepted. When calculating a claimants eligibility for Social Security benefits, one of the most important questions they will ask is whether or not your disability allows you to do the work you did previously. If you cannot, they will look at your ability to have a substantial gainful employment in another field. If you work, your eligibility for [social security benefits](#) will depend on the kind of work you do and how much money you make doing it.
